

**Lab No:** Project Part 1

**Lab Title:** User Interface Design

**Objective:** At the end of the lesson, students will be able to propose appropriate screen designs to meet the application requirements.

**Resources:**

1. Computer
2. Application requirements specification

**Procedures:**

1. For each functional requirement that you have identified and documented in the application requirements specification, propose a set of screen designs that incorporates the appropriate navigation structure, web layouts, and UI components.
2. Draw out your screen designs in powerpoint for presentation and submission.
3. Refine and finalised your screen designs.
